## ***Global Com Inc.***

### **Company Snapshot**

**Industry Type:** Passive IT  
**Network Design & Installation**  
**Cabling Contractor**

**Number of Employees:** 30

**Number of Locations:** 2

**Scope of Work:** Design/install structured cable networks including all fiber and copper solutions, Air Blown Fiber, and PDS required for classified network deployment

**Company Website:**  
[www.globalcomva.com](http://www.globalcomva.com)

### **Experience:**

Global Com has completed many projects over the years from the most basic office environment to some of the most challenging projects in the industry. These include cable installation on-board ships and in iconic public buildings with historic significance. We have provided network services to some of the most secure networks in classified government locations and in extreme conditions under brick sidewalks under the streets of Georgetown.

### **Mission Statement:**

To provide the highest service levels to our customers which create long lasting relationships. Clear focus on proper installation practices that increase the long term value of the customers' investment in their network infrastructure.

### **Business Description:**

Global Com provides full service structured network cabling solutions to demanding government agencies that require high performing networks installed to exacting standards, and where network downtime is not an option. Our solutions often contain multiple redundancies, specialized controlled pathways and intelligent passive cabling capabilities. Global Com focuses on forming long term relationships with our customers that allow us to help them develop and maintain their long-term strategies for network growth.

### **Company Background:**

Global Com was established in 1996. Then, as now, we focused on quality installations but we specialized in providing high volume cable rough-in services, often with extremely compressed installation schedules.

### **Value-Added Services and Contract Vehicles:**

- We install all manufactures cable solutions. We are certified installers for Berk-Tek Ortronics and Siemon end to end solutions and provide 25 year warranties for these high-end products.
- We provide all Outside Plant(OSP) installation services with confined spaces certifications for all types of manhole work.
- We are certified installers for the Sumitomo AirBlown Fiber solution.
- Global Com is the only qualified and certified installer all DHS installations for the Interceptor, an intrinsically alarmed solution that replaces the hardened PDS requirements for all classified network deployment, including SIPRnet and JWICS.

**Target Markets:** All Government Agencies, both Civilian and DOD.

**Key Locations:** 6711 Lee Highway Suite M3  
Arlington, Virginia, 22205
