Building safety™

At Strand, a surveillance company established solely for the education market, we understand that security has become a rising priority with school boards and administrators, as well as the community at large. Educators across the nation are tasked with the challenge of defining, developing and implementing the most current and reliable security solutions.

Digital IP Surveillance plays a key role. Strand's Digital IP Surveillance solution connects directly to your existing IP network, providing digital video for simultaneous recording and remote access to live views and playback of recorded images. Beyond the excellence of its individual components, Strand's fully integrated solution meets several fundamental objectives.

>

>Digital.

The solution utilizes state-of-the-art, server-based technology, coupled with the highest quality digital cameras, to create a totally digital surveillance solution. From the camera to the end user the images are 100% digital, creating an optimal viewing environment.

>Scalable.

You can have any number of cameras in any location – you're not limited by input ports as you are with a DVR system. There is no software to download and the Strand surveillance system can be viewed from any computer in the world via internet.

>Straightforward.

You can have an unlimited number of users. Strand's state-of-the-art technology allows even the most technically inexperienced user to understand and navigate the system with ease.

>Affordable.

There are no software fees. Strand's end to end prices are all inclusive. You know your cost if you're adding one camera or one hundred cameras.

>Reliable.

Through the unique architecture of Strand's software, archived images are captured and saved in the most reliable format available.

Strand's Commitment:

Pricing - All Inclusive

At Strand, we pride ourselves on providing our customers with a pricing model that has no hidden costs. When you contract with Strand you will not be charged for licensing fees, product upgrades and additional software modules.

Support - Localized

It is imperative to have localized vendor support by utilizing your existing service provider when possible. Localized, just-in-time inventory allows quick access to the newest and highest quality hardware replacement components for this mission-critical application.

Hardware - Best of Class

At Strand, we are hardware agnostic. Whether its cameras, servers, housings, cabling or any

of the components that make up Strand's best-of-class solution, you are assured that we, as an integrator, are utilizing the best and most current hardware components available.

This approach allows your district

Strand's unique archiving configuration allows for the most reliable image capture and storage capability on the market

competitive choices versus the single vendor locked-in approach of a DVR.

Software - Evolving

Strand's surveillance solution, fueled by Strand's custom designed open-source software, leverages your existing IP-network infrastructure. Through the utilization of standards-based, digital IP technology, Strand provides an optimal surveillance platform.

PARTNERING WITH SCHOOLS

Strand's 20/20 VU™ Digital IP Monitoring delivers a dramatic improvement in the security of your facilities, the safety of your people and the safety of the students entrusted to your care. 20/20 VU™ Digital IP Monitoring enables remote monitoring, wireless monitoring,

and comprehensive recording, archiving and retrieval of security images.

With Strand's Digital Surveillance, you can react to incidents quicker and with better information. **It's surveillance evolved—and Strand takes you there.**

about•strand

Flexible and powerful, with the click of a mouse, Strand's web-enabled digital surveillance solution enables you to easily and effectively keep in touch with your students, your staff and your facilities.
